

На основу члана 63. став 3. Закона о јавним набавкама ("Сл. гласник РС" 124/12, 14/15, 68/15) у преговарачком поступку јавне набавке бр. 92/15, питања и одговоре објављујемо на Порталу јавних набавки и интернет страници наручиоца ЈП "Скијалишта Србије"

ЈН 92/15 – Сервисирање са обуком и замена дефектних делова супервизијом на жичарама Doppelmaur, у ски центрима Копаоник и Стара планина

ПИТАЊА И ОДГОВОРИ 1 од 26.01.2016.

Питања потенцијалног понуђача и одговори наручиоца :

Питање:

Table 1, Position 6.) Set the parts on the type of installation to service and training in service work and emergency brakes and sheave – servicing.

Both, the demand of the training and especially the scope of required service work needs to be defined in detail. It is possible to give a general advice for the most probably required / recommended parts for the sheave assembly service (based on our last quotations). Similar we can do this for the emergency break as well. Anyway, I'm sorry, it is not possible to give a serious, binding quotation for a "general" service /maintenance of an installation without having an idea about its present condition, the customer performed services and maintenance in the past and the expected scope of service.

Please advise how to proceed with this position.

Одговор:

The costs of this position should include the costs of set the parts which are replace in service period.

Troškovi ove pozicije treba da sadrže cenu seta rezervnih delova koji se menjaju tokom servisa hitne kočnice.

Питање:

*Table 1, Position 7. and 8.) Central Processing Unit PILZ PSS SB CPU 3 (ETH 2) servicing.
Please explain what is expected to be offered with this position? The central processing units can be understood more or less like a personal computer unit ... It can (maybe) become repaired if doesn't work but when it works fine there is no demand nor possibility for a service.*

Одговор:

In this public procurement we want to have possibility to buy Central Processing unit. In another words, we need to have unit price only for delivery this unit.

U ovoj javnoj nabavci hoćemo da imamo mogućnost kupovine Central Processing Unit PILZ PSS SB CPU 3 , tj moramo da imamo jediničnu cenu za isporuku ove jedinice.

Питање:

Table 1, Position 9.) Engaging mechanization for service

If there is the requirement of a crane and similar equipment (for example to disassemble the sheave assemblies, bringing them to the workshop ...) this needs to be organized locally and is expected to be provided by and on behalf of the customer. Of course we can offer the costs for providing any required special tools (if applicable) which our technicians need to bring along from Wolfurt/Austria.

Одговор:

The costs for engagement of crane or some similar machine have to include in your bidden documentation.

Troškovi za angažovanje dizalice ili neke slične mašine treba da budu uključeni u vašoj ponudi.

Питање:

Table 2, Position 36. and 67.)

There is no ident number given for this parts. To verify them and to be sure to offer the correct parts please let us know to which installation they belong.

Одговор:

Both parts belong 4CLF installation.

Oba dela pripadaju instalaciji 4CLF (fiksni četvorosed).

Одговори су саставни део конкурсне документације.
